Darren Kwong

Full-Stack Web Developer

User-focused web developer with a passion for integrating technologies to solve problems and improve upon existing methods. I draw on my background in digital marketing and finance to gain unique perspectives on how end-users interact with websites and software platforms. I enjoy approaching programming challenges from different angles and collaborating with others to create meaningful web applications.

WORK EXPERIENCE

Javascript Full Stack Web Development Program
University of California Berkeley Extension

07/2017 – 01/2018

Comprehensive program covering core web development technologies: HTML5, CSS3, JavaScript, jQuery, Express.js, React.js, Node.js, MySQL, and more.

Achievements/Tasks

– Developed project management skills scoping out project workflows and technologies allowing for rapid development to meet tight deadlines.

– Built websites and applications from scratch as well as with ready-made frameworks in a fast paced environment.

– Ran through the entire development cycle of complex projects in both independent and collaborative settings.

PPC Account Manger
Fourandhalf

02/2015 – 09/2017

Internet Marketing for Property Managers

Achievements/Tasks

– Designed and implemented landing page strategies and tests to optimize conversion rates.

– Implemented time saving automated bidding and url tracking scripts for Google Adwords campaigns.

– Contributed to company video blogs to educate subscribers and promote Fourandhalf's brand.

EDUCATION

Javascript Full Stack Web Development Certification
University of California Berkeley Extension

07/2017 – 01/2018   *Berkeley, CA*

B.S Business Administration
University of California Riverside

08/2002 – 06/2006   *Riverside, CA*

SKILLS

HTML5   CSS3   Javascript   React.js   Node.js

MongoDB   MySQL   Express   Bootstrap   Bulma

Jquery   Chart.js   Firebase   Handelbars.js

Command Line   Github   AJAX   JSON   Heroku

PERSONAL PROJECTS

Tregg (12/2017 – Present) ↗

– Scoped out project technologies to aggregate unbiased restaurant data, wireframed UI/UX for end-user, and mapped out project workflow.

– Utilized Javascript, React.js, HTML5/CSS3, Bulma, and Chart.js to create a responsive grid layout and visualize restaurant data.

– Setup Node.js server, defined routes with Express Router, and utilized Axios to make API requests and fetch data from MongoDB.

NBA Stats (10/2017 – 11/2017) ↗

– Developed backend scripts to retrieve player data from MySportsFeed.com API and stored in MySql database.

– Utilized Express server to handle API routes along with bodyparser to parse client data.

– Frontend designed with Javascript, CSS3, and Bootstrap along with Chart JS for data visualization.

Run It Down (09/2017 – 10/2017) ↗

– Utilized Google Maps API to geolocate users and Google Places API to generate unique running routes recommended based on user's input.

– Mobile friendly design created with Bootstrap, Javascript, CSS3 along with CanvasJS for data visualization.

– User data stored in Firebase database and user authentication handled via FirebaseUI allowing for user friendly single sign-on.
